

“We would consistently opt for the system from Vision Experts“

Pharma Druck Dresden is a family-run business that has specialised in secondary packaging such as labels, packaging inserts and mini brochures for the pharmaceutical, cosmetics and food industries.

The company was founded in 1992. Pharma Druck Dresden offers its customers flawless products with strict quality standards in the production of print products.

2008 saw Pharma Druck Dresden expand and install the latest technology and state-of-the-art machinery, including Vision Experts inspection systems. Every year, 50 employees process about 2,500 orders from Germany and around Europe.

Quality and reliability are the paramount priorities for Pharma Druck Dresden. Quality is guaranteed with the implementation of various measures. The inspection systems from Vision Experts play a major role in the print process over and above the MediaCheck digital test software from tec4check.

This ensures that spots and other imperfections can be detected and rectified quickly during the print process.

Just taking a high number of random samples is not enough to guarantee the high quality levels for our print products. In-process inspection is indispensable. Since the introduction of Vision Experts systems, the number of flaws and the number of complaints have dropped sharply”, explains CEO Christian Mägerlein.

Machine operator Stefan Lösche adds, “In-process inspection with Vision Experts saves us a great deal of set-up time. Flaws are detected faster, enabling us to work efficiently. The system simplifies our workflow considerably with its ease of use and low level of maintenance work required.”

“Smooth in-process inspection not only saves time - it also spares us from unnecessary follow-up costs. We would consistently opt for the system from Vision Experts”, says Mr. Mägerlein, assessing the implementation of Vision Experts at Pharma Druck Dresden.

About Vision Experts

Vision Experts GmbH is a specialist in 100% inspection of premium-quality print products. All solutions are tailored to the needs of our customers. We are amongst the leading suppliers - with over 300 installations for 100% print inspection in 15 countries.

Our solutions are working in web and sheet-fed printing machines, and for converting equipment. Our list of customers includes leading printing machine manufacturers, international packaging manufacturers and medium-sized businesses.
